On-Demand Thermal Printer for Garden Centers, Greenhouses & Nurseries

offered exclusively by: United Label & Sales Corp.

PRINT ALL THESE MATERIALS ON-DEMAND

For a complete list of materials or more info visit
www.UnitedLabel.com

Standard printer features:

- Parallel, Serial & USB ports
- External media holder + cable
- 4.09" maximum printing width
- Minimum size label: .75" W x .4" H
- 984' ribbon length
- 2 year limited warranty on printer

\$995 PC Driven System

includes label design software

A thermal transfer
alternative to dot
matrix printing.

UL-247
Stand-alone
shown

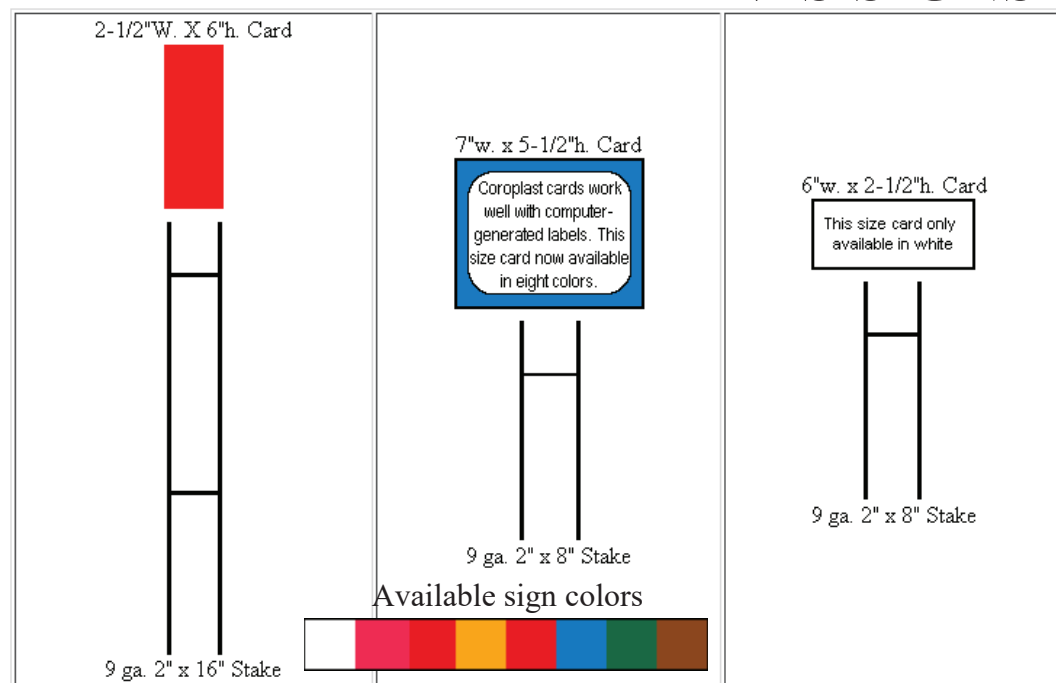

\$865 Stand-Alone System

Out of the box and ready to go. The UL-247 desktop nursery tag and label printer is packaged to run with or without a computer. We can design formats, tailored to your specs, which are then downloaded to the printer for future recall with the attached keyboard for only \$865.

Or, use the label design software and run the UL-247 directly from a computer for just \$995. This full version software includes resident plant databases and is able to link directly to Excel spreadsheets for efficient data management. Graphics and barcodes, including QR codes, are easy to produce.

Uses many of the same roll stock as our larger table top printers. Runs full size rolls of stock (3" core with 8" OD)

PARKER DAVIS SIGNS

- Signs are of 4mm corrugated polypropylene material and will hold up for several years outdoors. Multiple colors and sizes to choose.
- Marker stakes are fabricated of durable 9 gauge galvanized steel. Stakes vary in length and will last several seasons.
- We have many thermal & laser adhesive label sizes to compliment these sign sizes.

Flexographic Printing (F)

Often abbreviated to flexo, this is a method of printing most commonly used for packaging. A flexo print is achieved by creating a mirrored master of the required image as a 3D relief in a rubber or polymer material. A measured amount of ink is deposited upon the surface of the printing plate (or printing cylinder) using an anilox roll. The print surface then rotates, contacting the print material which transfers the ink.

Need a QR code or a MS Tag? We can help.

QR Code is a matrix barcode (or two-dimensional code), readable by QR scanners, mobile phones with a camera, and smartphones.

The code consists of black modules arranged in a square pattern on white background. The information encoded can be text, URL or other data.

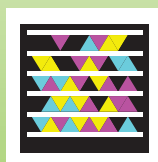

Codes can be customized to link to any page on your website.

Goes to: <http://horticulture.satoamerica.com/>

MS Tag or Microsoft Tag is an implementation of HCCB using 4 colors in a 5 x 10 grid. Additionally, the code works in monochrome. The print size can be varied to allow reasonable reading by a mobile cameraphone; for example, a Tag on a real estate sign might be printed large enough to be read from a car driving by, whereas a Tag in a magazine could be smaller because the reader would likely be nearer.

A Microsoft Tag is essentially a machine readable web link, analogous to a URL shortening link: when read, the Tag application sends the HCCB data to a Microsoft server, which then returns the publisher's intended URL. The Tag reader then directs the user's mobile browser to the appropriate website, not unlike how CueCat operated. Because of this redirection, Microsoft is also able to provide Tag analytics to publishers.

TXPSX Thermal Printer

The TXPSX models contain the features that make them the best-seller in the horticultural market. The rugged powder-coated industrial strength steel case is designed for harsh environments, yet still attractive for office or store settings. These printers easily handle material thickness up to 24 mil at speeds up to 10" per second. They are available with 5" (300 dpi) print heads with 10" tag width allowance. The TXPSX models come standard with USB, Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). Ethernet connectivity is available as an option.

⑤ TECSX5M	1	60 lb.	\$3,545.00	EA

CG408 Thermal Printer

The CG408 desktop printer is a great complement to our SX model line of printers. The CG408 can print up to 4" wide at (203 dpi), up to 4 ips. This printer is designed primarily for thinner gauge materials, such as pressure sensitive adhesive labels, our TT End-to-End Slip-On® tags, and also our ZX pot stakes. The CG408 offers a lower cost addition to help reduce changeover time for customers using different types of media. In order to utilize the full features of this printer, TAGGIT™ Pro V8.6 is the minimum version required. Optional Argox unwinder (59-C2103-011/\$29.00MSRP)

Item No.	Qty Pack	Printer Weight	List Price	U/M
④ CG408TT	1	8 lb.	\$695.00	EA

CLNX™ Series Thermal Printer

A revolutionary industrial class of thermal printers utilizing SATO's innovative user design philosophy featuring an easy to use platform for the most demanding customer application and environments.

Preinstalled operational videos viewed on a full color LED screen make training, setup and operation exceptionally easy. Other product key features include; 60° high lift print mechanism for simplified media and ribbon loading, coreless ribbon take up, multiple on-board interface connectivity, collapsible bi-fold side access cover for tight print locations, Energy Star compliant, available in 4" and 6.5" wide models- IDEAL for tags, RFID tags, labels, and signage. **Call your regional SATO Authorized Master Reseller for compatible ribbons, tags, labels and additional information.**

Thermal Slip-On® End to End Tags Low Density Polyethylene (TX, TT) 10 mil

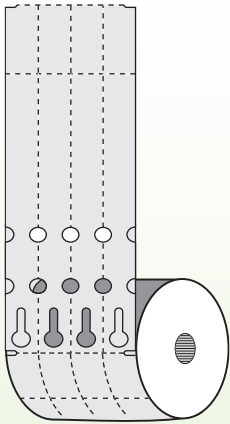

Our Thermal Slip-On® tags are a great way of identifying your product. Once locked, it will stay on the plant material until removed. Thermal print adheres to the surface for years, and will not fade away. The dry printing process means tags are ready to use as they come off the printer. Our Thermal Slip-On® tags can be preprinted flexographically during the manufacturing process or with the thermal transfer printing method.

Thermal Pot Tags Thermal Material (ZX) 13 mil (White material only), Styrene Material (SX) 20 mil, Heavy Plastic Material (PX) 23 mil

Our Thermal Pot Tags can be preprinted using thermal transfer (all materials listed), hot stamping (all materials listed), and flexo (ZX 13mil Styrene only).

Thermal print adheres to the surface for years, and will not fade away. The dry printing process means tags are ready to use as they come off the printer.

Thermal Material (ZX) and Styrene Material (SX)

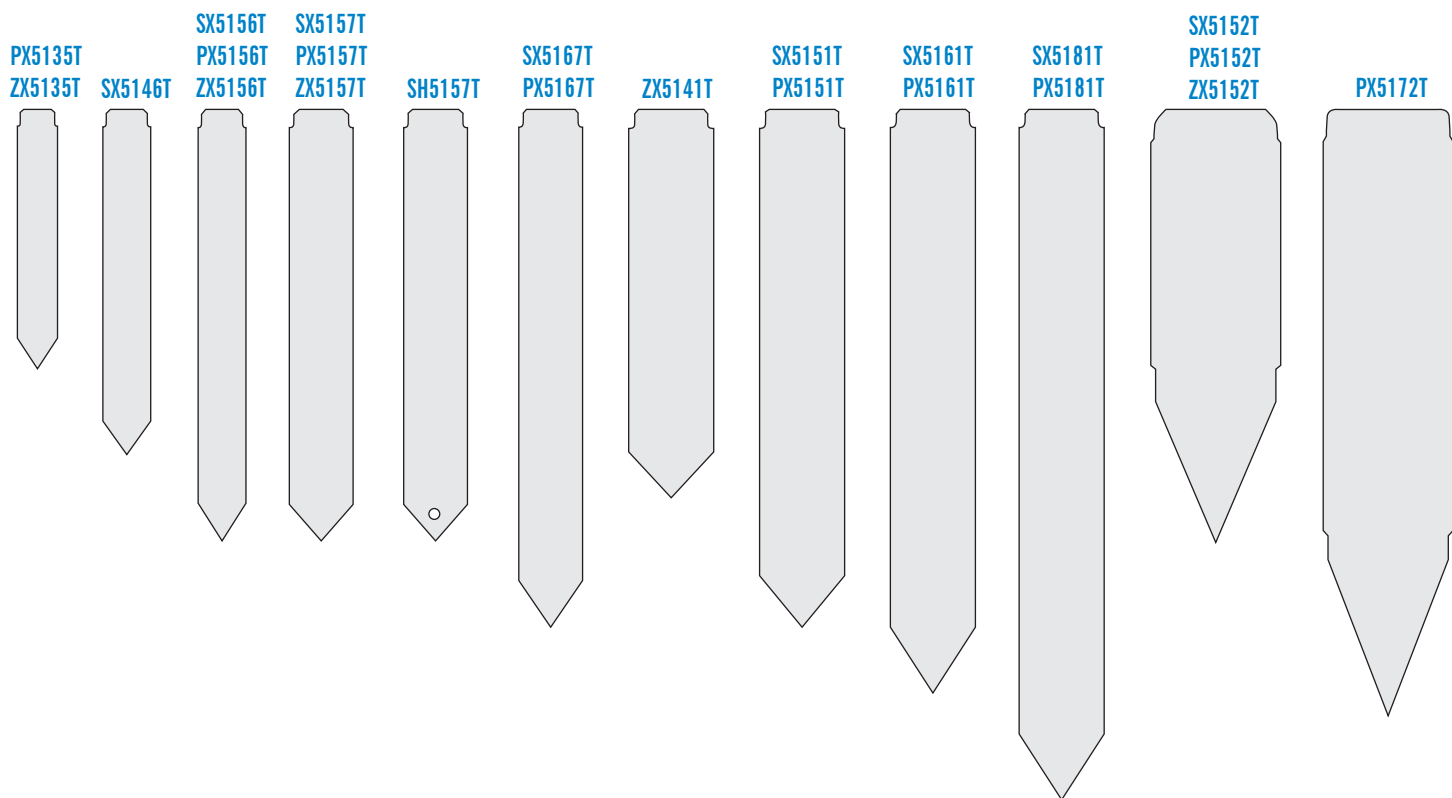

Heavy Plastic Material (PX)

Thermal Pressure Sensitive Signs Floratherm (FT) 3.2 mil

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The signs can be applied to smooth damp containers, flats, and trays with excellent results. Signs may be preprinted with decorative borders and your company name or logo. Signs can also be flood-coated to create additional color options.

Thermal Pressure Sensitive Labels Floratherm (FT) 3.2 mil

The floratherm material is designed with an aggressive adhesive and top coated face stock that resists water and sunlight while providing a superior thermal transfer print surface. The labels can be applied to smooth damp containers, flats, and trays with excellent results. Our thermal pressure sensitive labels can be preprinted flexographically during the manufacturing process or with the thermal transfer printing method. Labels are wound in.

Clear and Block-out Labels

All of the below label sizes are also available in a Clear Synthetic (Plastic) or with Block-out Adhesive. Clear labels are commonly used to place variable data on custom printed picture tags in an attractive manner. Block-out adhesive labels are designed to cover up whatever is behind the label. If you need to re-price or change a bar code, the Block-out Adhesive label will not allow the original information to show through. If you are interested in either application, please contact your Authorized Master Reseller for a quote.

Thermal Transfer Pressure Sensitive Paper Labels

SATO's Thermal Transfer Pressure Sensitive Paper Labels have many uses. The face sheet is thermal receptive and can also be flood coated in various colors to be used in case labeling and for product identification in warehouses. The high quality face sheet is coupled with an aggressive, permanent adhesive to insure long term adhesion of the label. If direct thermal printing is the preferred print method, SATO also offers direct thermal pressure sensitive paper labels for various applications. Let SATO fill all your pressure sensitive paper label needs.

Custom Preprinted Tags

Tags designed using a company logo or a specific marketing need. Preprinted tags can later be thermally imprinted with a UPC, price, or other variable information.

Flexo Printed

Tags are produced via Flexographic Printing with up to 3 colors.

Preprinted

Custom preprints can be produced using information, logos, or graphics that will appear on all tags of an order.

Imprintable

Once printed, these tags can be imprinted with a thermal printer, and then be ready to use immediately.

Think SATO for all of your label needs.

Pressure-sensitive labels, tickets, and tags

- Full range of paper, film, and adhesive options
- Up to 7 colors including 4-color process
- Computerized ink system
- Spot and full coverage water and UV varnish
- Full and pattern adhesive coating
- Inline lamination and Integrated Forms
- Tamper-evident labels
- Complete prepress capabilities
- Packaged in rolls, fan-fold, sheets, or stacks

Valueline Laser Printable Slip-On® Tags Laser Material (VL) 5 mil

The Valueline Laser Printable product is a 5 mil material that is top coated on both sides to provide superior imaging and longevity outdoors. Our Valueline is viable for all of your monochrome laser printing applications, but is also a solution to most of your color printing applications as well. This economically priced laser printable material can cover almost all of your laser printing needs. Our laser Slip-On® tags may be preprinted with information such as company name, website and logo for maximizing company visibility.

T-Stakes and Injection Molded Stakes

T-Stakes are produced from 30 mil white polystyrene for easy insertion into most soil. They may be purchased blank or preprinted in one or two colors. Our fade resistant pens found on page 26 can be used also to write on these stakes.

Injection Molded Stakes are made of heavy-duty plastic from 55 mil to 70 mil thicknesses. These stakes are sturdy enough to be inserted into most mediums. Surfaces accept writing with fade resistant marking pens. (See pg. 26)

Pressure Sensitive Labels are available for most injection molded stakes. Please see pages 12 and 13 for appropriate labels.

Ringer and Rings

The ringer has revolutionized the auto-ringer market with its "pneumatic-like" action and ease of use. From balling and burlapping, to tagging of pots, this tool puts affordability with quality. The "D" shaped ring creates a triangle "△" when attached.

RINGER "△"

G7 Auto Ringer and Rings

The application of the self-feeding principle to the familiar hog ring plier meets a need that all users of this fastening method have been waiting for. The auto ringer cuts operating time and costs, and increases savings and profits. A very useful tool on every job within the range of this staple size. The SR8GPL rings for the G7PL are galvanized. The "C" shaped ring creates a circle "○" when attached.

Handheld Labeling

SATO offers a variety of one, two and three line Handheld Labeling Systems, ideal for low and high-volume users. They allow you to mark thousands of items quickly and reliably. Used for price marking, mark downs, lot/batch coding and work-in-process the applications are endless. Stock, color and custom preprinted labels are available.

SATO Kendo, Judo, and PB-2

- Offers a wide variety of print formats
- One, two and three line hand labelers
- Label feed slots ensure positive registration
- Print band options for all types of applications
- Reliable and versatile hand labeling solutions

Tree Wraps - Generic

Generic printed tree wraps, 10" x 12" and 10" x 18". Printed up to three colors featuring your company logo, care information, and planting instructions. Just wrap and staple, no messy glue strips to contend with.

10" Wide x 18" Tall (Flat) 5" Wide x 18" Tall (Folded)

10" Wide x 12" Tall (Flat) 5" Wide x 12" Tall (Folded)

Tree Wraps - Custom

Custom printed tree wraps, 10" x 12" and 10" x 18". Printed up to three colors featuring your company logo, care information, and planting instructions. Just wrap and staple, no messy glue strips to contend with.

Simply SATO

Economical tags that offer the combination of variably imprinted information with preprinted graphics and custom branding.

On demand Printing Provides Flexibility

- Adjust item pricing to impact sales
- Add store branding messages
- Include product descriptions to match your stock

Secure Attachment

Clip tag to elastic band, plant stem, or bamboo stake or hang from string for quick and simple display.

Simple Price Removal After Purchase

Perforation allows customer to remove the price after purchase; Perfect for gifts!

Eye-catching Designs Help Move Inventory

Custom branding and logos can be added.

Care Instructions Ensure Long Plant Life

Care instructions printed on the back of tag, will help your customers take proper care of floral items.

Renewable Resource

All natural paper stock.

SATO has developed several stock designs and can produce custom preprinted logos or layouts. The Simply SATO tags are designed with both the retailer and the consumer user in mind and are bright, eye-catching, contain a wealth of information, and are simple to use. Retail customers will be attracted to products with the Simply SATO tags attached and purchase products for everyday or special occasions where they may not have otherwise. In addition, the tags offer retailers an economical means to enhance the image of their product and increase sales.

Tray Handles, Custom-
Cards, and more.**

Custom printing is an excellent marketing tool. It directs consumers to your product, answers common questions about your product, and creates an identity for your product and company.

SATO's experienced graphic design team can bring you fresh ideas to meet consumer trends. We're committed to developing the most effective printing solutions for you and your product. Differentiation is a key to distinguishing your program from the masses.

Supply your own art, or have the SATO team create a design that compliments and promotes your product.

If you're not looking for a custom sized project, we also have a large library of standard shapes available.

TXPSX Thermal Printer

The TXPSX models contain the features that make them the best-seller in the horticultural market. The rugged powder-coated industrial strength steel case is designed for harsh environments, yet still attractive for office or store settings. These printers easily handle material thickness up to 24 mil at speeds up to 10" per second. They are available with 5" (300 dpi) print heads with 10" tag width allowance. The TXPSX models come standard with USB, Parallel Port, Serial Port, Ribbon Save Mode and a FETHER head (floating edge type head revolution). Ethernet connectivity is available as an option.

Call your local reseller for pricing.

CLNX™ Series Thermal Printer

A revolutionary industrial class of thermal printers utilizing SATO's innovative user design philosophy featuring an easy to use platform for the most demanding customer application and environments.

Preinstalled operational videos viewed on a full color LED screen make training, setup and operation exceptionally easy. Other product key features include; 60° high lift print mechanism for simplified media and ribbon loading, coreless ribbon take up, multiple on-board interface connectivity, collapsible bi-fold side access cover for tight print locations, Energy Star compliant, available in 4" and 6.5" wide models- IDEAL for tags, RFID tags, labels and signage. **Call your regional SATO Authorized Master Reseller for compatible ribbons, tags, labels and additional information.**

Radio Frequency Identification or RFID as it's most commonly known as, is a technology using radio signals to communicate with a RFID enabled tag or label, and by extension, the item to which the RFID tag or label is attached. It is now commonly used to identify a wide variety of items in many industries and applications, including those found across markets of horticulture and agriculture.

RFID has an advantage over traditional barcode use. The differences are as follows: barcodes require a line-of-sight reading (scanning) of a printed barcode symbol. Whereas RFID technology does not require a line-of-sight reading and can read or write to hundreds of RFID enabled media identifiers at once - saving time, labor, and reduction in counting errors.

Many SATO printers offer RFID tag, stake, and label encoding as an option in both UHF (ultra high frequency) and HF (high frequency) technology. Whatever your application and identifying needs may be, SATO and its horticulture reseller network have the media and printing/encoding products that answer your every need for any

RFID based solution.

Having options is very important to us. SATO remains dedicated in our efforts to use materials that are cost effective and earth friendly.

Throughout our catalog we've identified material with a recycle code, to provide options for material that's recyclable. Along with material that can be recycled, SATO offers many alternatives such as bio-friendly printing material, and paper options.

Let's keep recycling.
