

TAGGIT PRO™

Tag and label design software

Whether you need to print bar codes, text, images, or from databases, **TAGGIT PRO™** has features to help you design and print labels with ease. It supports over 30 bar code symbologies, TrueType fonts and over 500 thermal and laser printers, providing you the flexibility to handle all of your labeling applications – today and in the future.

TAGGIT PRO™ from **SATO Labeling Solutions America, Inc.** includes free phone support and a plant database with over 4,500 records. This includes Annuals, Perennials, Trees and Broadleaf Shrubs, and is totally editable to add additional varieties or informations.

Go from template to tag! Load templates and plant information to quickly design tags (above) and print tags exactly as designed (below).

Contact **SATO Labeling Solutions America, Inc.** today to set up a free trial of **TAGGIT PRO™** and experience industry-leading label design and printing.

System Requirements

- Windows XP, Windows 7, Server 2003, or Server 2008
- VGA monitor or better
- Parallel Port
- Serial Port (if required by printer)
- Mouse
- 40 MB free hard drive space

Features

General

- Print-only version
- Label samples
- Undo
- Hidden (unprintable) objects
- Graphic formats imports (bmp, pcx, jpg, tif, etc.)
- Color support
- Color graphic reduction
- Graphical, native and bar code support
- 2D bar code support
- HIBC support
- Object positioning
- Multi-level password protection
- Label specific passwords
- Label previews
- Multilingual support (18 languages)
- Long file names
- Unlimited fields
- Print to picture or to file
- TextArt

Database

- Database editor (DBF and ODBD data source)
- OLE DB and ODBD support
- Key field access to database records
- Table view/print
- DSN File support

Variables

- Flexible date and time stamping
- Variable graphic images
- Shared serial files
- Linked expressions
- Add an offset to date
- Incrementing fields

User Input Fields

- Set input format
- Pick List data entry
- Minimum input length

Tools

- Pocket LABELVIEW support
- Directly modify printer code with Job Modifier utility
- LABELVIEW Symbol TrueType Font (industry specific symbols)

Programmability

- OLE Client (insert WordArt, spreadsheets, etc.)

LabelView™ Gold

The ultimate in label design and integration, CommWatch allows you to link with weigh scales, bar code scanners, shop floor controllers, counters or other devices. Receive, format and use data from this source instantly to put required data into labels without keying. DataWatch lets you monitor a file directory, whenever a database has records added to it, or a new database written to it by another host or application. LabelView™ Gold can be configured to print appropriate labels; automatically and instantly.

Network Versions - Gold

3, 5, 10, 25 and 50 users
