

# Sensors/Strata® SX

- Sleek low-profile design**
- Wide-aisle performance**
- Comprehensive tag compatibility**
- Visible and audible alarm features**

**When space is at a premium and appearance counts, Checkpoint's Strata SX antenna provides excellent detection in a compact package. A sleek design and a footprint just 6 inches (152 mm) in diameter make the Strata SX ideal for retailers who want EAS security without sacrificing aesthetics or floor space.**

#### **Wide-aisle performance**

Featuring high-performance Strata electronics, a single Strata SX system provides highly reliable detection at a 5-foot (1.5m) opening. Checkpoint's state-of-the-art Digital Signal Processing and Advanced Digital Discrimination provide superior detection and virtually eliminate false alarms.

#### **Low-profile appearance**

With a neutral design and color scheme, the Strata SX seems to disappear into the store environment. It is made of nearly transparent, scratch-resistant, clear acrylic, with textured gray decorative inlay and base covers. Custom inlay and base colors are available.

#### **Comprehensive tag compatibility**

Strata SX works with Checkpoint's complete range of 8.2 MHz radio frequency (RF) labels, as well as items source tagged with Checkpoint's patented RF circuits. Tagged merchandise may be placed near the pedestals, allowing retailers to maximize selling space.

#### **Clear alarm notification**

Strata SX features both visible and audible alarms. In stores with more than one antenna, pedestals will alarm independently. This makes it easy to identify the area where the alarm has occurred.

**The Strata SX delivers the power of Digital RF in an aesthetically pleasing design.**

# Sensors/Strata® SX

Strata SX

## Specifications:

**Height:**

60" (1524 mm)

**Base Diameter:**

6" (152 mm)

**Weight:**

25 lbs. (11.4 kg)

**Material:**

Scratch-resistant, clear acrylic\* with textured gray inlay

**Power:**

110 VAC, 50/60 Hz

**Electronics:**

Transceiver

**Color:**

Light gray, high-impact plastic-molded color cover

\* Strata SX should only be cleaned with an ammonia-free cleaner

## Strata SX Detection:

One Strata SX provides 2.5 feet of detection on both sides.

Two Strata SX set 5 feet apart provide 10 feet of detection.
